| AUTHOR INDEX, Volume 113, Number 1, May 31, 1983                                                                                                                                                                                                             | ii  |
| Monoclonal Antibodies against the Human Acetylcholine Receptor<br><i>Béatrice Vernet Der Garabedian and Evelyne Morel</i>                                                                                                                                    | 1   |
| The Backbone and Side Chain Conformations of the Cyclic Tetrapeptide HC-Toxin<br><i>Paolo Mascagni, Mark Pope, William A. Gibbons, Lynda M. Ciuffetti, and Herman W. Knoche</i>                                                                              | 10  |
| Stimulation of Melanotic Expression in Murine Melanoma Cells Exposed to Polyamine Antimetabolites<br><i>Kirsti Kåpyaho and Juhani Jänne</i>                                                                                                                  | 18  |
| Decreased Micrococcal Nuclease Sensitivity of Nuclei from Nerve Growth Factor-Treated PC12 Cells<br><i>Stanley A. Vinores, Nathaniel Tolson, Vivian Zabrenetzky, and Gordon Guroff</i>                                                                       | 24  |
| Rimorphin (Dynorphin B) Exists Together with $\alpha$ -Neo-endorphin and Dynorphin (Dynorphin A) in Human Hypothalamus<br><i>Kazuwa Nakao, Takaaki Yoshimasa, Mitsuaki Suda, Makoto Sakamoto, Yoshio Ikeda, Kyoze Hayashi, and Hiroo Imura</i>               | 30  |
| 2-Fluoro-ATP: A Toxic Metabolite of 9- $\beta$ -D-Arabinosyl-2-fluoroadenine<br><i>Vassilios I. Avramis and William Plunkett</i>                                                                                                                             | 35  |
| Direct Demonstration of Increased Intracellular Concentration of Free Calcium in Rabbit and Human Neutrophils following Stimulation by Chemotactic Factor<br><i>J. R. White, P. H. Naccache, T. F. P. Molski, P. Borgeat, and R. I. Sha'afi</i>              | 44  |
| Identification of Phospholipid Platelet-Activating Factor (1-O-Alkyl-2-acetyl-sn-glycero-3-phosphocholine) in Human Amniotic Fluid and Urine<br><i>M. Motasim Billah and John M. Johnston</i>                                                                | 51  |
| The Heterogeneity of Arylhydrocarbon Hydroxylase in Fetal Liver Microsomes of Rats<br><i>Keinosuke Mizokami, Momoko Sunouchi, Kazuhide Inoue, Kannosuke Fujimori, Akira Takanaka, Yoshihito Omori, and Toshitsugu Yubisui</i>                                | 59  |
| Presence of Low-Molecular-Weight Polypeptides in Human Brunescant Cataracts<br><i>J. Horwitz, J. S. Hansen, C.-C. Cheung, L.-L. Ding, B. R. Straatsma, D. O. Lightfoot, and L. J. Takemoto</i>                                                               | 65  |
| 1-O-Alkyl-2-acyl-sn-glycero-3-phosphocholine: A Novel Source of Arachidonic Acid in Neutrophils Stimulated by the Calcium Ionophore A23187<br><i>Charles L. Swendsen, J. Marshall Ellis, Floyd H. Chilton III, Joseph T. O'Flaherty, and Robert L. Wykle</i> | 72  |
| Insulin-like Effect of Vanadate on Adipocyte Glycogen Synthase and on Phosphorylation of 95,000-Dalton Subunit of Insulin Receptor<br><i>Shinri Tamura, Theresa A. Brown, Robert E. Dubler, and Joseph Larner</i>                                            | 80  |
| Effect of Aphidicolin on the Elongation Step of Adenovirus DNA Replication <i>in Vitro</i><br><i>Hiroyoshi Ariga</i>                                                                                                                                         | 87  |
| Effects of Sterol Manipulation on Microsomal Desaturase Activities in <i>Tetrahymena</i> : With Regard to Thermal Acclimation<br><i>Shigenobu Umeki and Yoshinori Nozawa</i>                                                                                 | 96  |
| Fluorescence Excitation Profiles of $\beta$ -Carotene in Solution and in Lipid/Water Mixtures<br><i>Marcel Van Riel, Johan Kleinen Hammans, Martin Van de Ven, Wim Verwer, and Yehudi K. Levine</i>                                                          | 102 |
| Effect of Antithrombin III, $\alpha_1$ -Proteinase Inhibitor, and Heparin on Amidolytic Activity of Nerve Growth Factor (7S-NGF)<br><i>William F. Long and Frank B. Williamson</i>                                                                           | 108 |
| Saturation Behavior of the Manganese-Containing Superoxide Dismutase from <i>Paracoccus denitrificans</i><br><i>Arielle Terech, Jacques Pucheault, and Christiane Ferradini</i>                                                                              | 114 |
| A 400-MHz $^1\text{H}$ NMR Study of Fortuitin, a Natural Linear Lipopeptide<br><i>M. Ptak, E. Vilkas, and C. Brevard</i>                                                                                                                                     | 121 |

|                                                                                                                                                                                                                                                                                         |     |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| The Effect of Copper Chelating Drugs on Liver Iron Mobilization in the Adult Rat<br><i>Nancy L. Cohen, Carl L. Keen, Bo Lönnerdal, and Lucille S. Hurley</i>                                                                                                                            | 127 |
| Mono(ADP-ribosylation) of Hen Liver Nuclear Proteins Suppresses Phosphorylation<br><i>Yoshinori Tanigawa, Mikako Tsuchiya, Yasuki Imai, and Makoto Shimoyama</i>                                                                                                                        | 135 |
| Induction of Endoreduplication in Chinese Hamster V79 Cells by Cytosine Arabinoside<br><i>Sadayuki Ban, Shozo Iida, Hachiro Shimba, Akio A. Awa, Suzanne M. Nowak, and Tsutomu Sugahara</i>                                                                                             | 142 |
| <sup>31</sup> P NMR and Viscometric Studies of the Interaction of meso-Tetra(4-N-methylpyridyl)porphine and Its Ni(II) and Zn(II) Derivatives with DNA<br><i>Debra L. Banville, Luigi G. Marzilli, and W. David Wilson</i>                                                              | 148 |
| Oxygen-Induced Inhibition of Light-Dependent Uptake of Tetraphenylphosphonium Ions as a Probe of a Direct Interaction between Photosynthetic and Respiratory Components in Cells of <i>Rhodospseudomonas capsulata</i><br><i>M. Rugolo and D. Zannoni</i>                               | 155 |
| Rat Pancreas Actin: Purification and Characterization<br><i>P. Gendry, J. F. Launay, and M. T. Vanier</i>                                                                                                                                                                               | 163 |
| Evidence of a Ca <sup>2+</sup> Gradient across the Plasma Membrane of Wheat Protoplasts<br><i>Karl E. O. Åkerman, Michael O. Proudlove, and Anthony L. Moore</i>                                                                                                                        | 171 |
| The Use of Cluster Analysis in Determining Possible Enzyme-Substrate Interactions with Reference to Nucleoside Diphosphatase Activity of Golgi Membranes<br><i>Alison King, Alan H. Fielding, and Christopher A. Smith</i>                                                              | 178 |
| [ <sup>3</sup> H]Nimodipine Specific Binding to Cardiac Myocytes and Subcellular Fractions<br><i>A. DePover, S. W. Lee, M. A. Matlib, K. Whitmer, B. A. Davis, T. Powell, and A. Schwartz</i>                                                                                           | 185 |
| Does the Induction of Macrophage Lysosomal Enzyme Secretion by Zymosan Involve the Mannose Receptor?<br><i>Judith L. Bodmer and Roger T. Dean</i>                                                                                                                                       | 192 |
| Exit of Proteins and Fragments Thereof from Mitochondria Is Accelerated by the Import of Cytosolic Synthesized Proteins<br><i>José Hernández-Yago, Erwin Knecht, Vicente Felipo, Vicente Miralles, and Santiago Grisolia</i>                                                            | 199 |
| Reconstitution of the Dicarboxylate Exchange Activity by Incorporation into Liposomes of a Triton Extract of Mitochondrial Rat Liver Inner Membranes<br><i>Mireille Saint-Macary and Bernard Foucher</i>                                                                                | 205 |
| Regulation of Hydroxylations in Biosynthesis of Bile Acids: Modulation of Reconstituted 12 $\alpha$ -Hydroxylase Activity by Protein Fractions from Rabbit Liver Cytosol and Microsomes<br><i>Henry Danielsson, Ingegerd Kalles, Bodil Lidström, Kerstin Lundell, and Kjell Wikvall</i> | 212 |
| Modulation of Prolactin Binding Sites <i>in Vitro</i> by Membrane Fluidizers. I. Effects on Adult Rat Ventral Prostatic Membranes<br><i>Jitendra R. Dave and Raphael J. Witorsch</i>                                                                                                    | 220 |
| Isolation and Sequence of a Non-opioid Peptide Derived from Proenkephalin<br><i>Randolph V. Lewis, Purnima Ray, Russell Blacher, and Alvin Stern</i>                                                                                                                                    | 229 |
| Cell-Free Synthesis of Succinate Dehydrogenase and Mitochondrial Adenosine Triphosphatase of Sweet Potato<br><i>Tsukahō Hattori, Yukimoto Iwasaki, Shigeru Sakajo, and Tadashi Asahi</i>                                                                                                | 235 |
| Diglyceride/Monoglyceride Lipase Pathway Is Not Essential for Arachidonate Release in Thrombin-Activated Human Platelets<br><i>Lee-Young Chau and Hsin-Hsiung Tai</i>                                                                                                                   | 241 |
| Neurotensin Regulation of TSH Secretion in the Rat<br><i>M. C. Sheppard, R. D. Askew, K. I. J. Shennan, S. Franks, and D. B. Ramsden</i>                                                                                                                                                | 248 |
| Proteolysis of the Epidermal Growth Factor Receptor by Endogenous Calcium-Activated Neutral Protease from Rat Liver<br><i>Ronald E. Gates and Lloyd E. King, Jr.</i>                                                                                                                    | 255 |
| Chronic Ethanol Administration Induced an Increase in Phosphatidylserine in Guinea Pig Synaptic Plasma Membranes<br><i>Grace Y. Sun and Albert Y. Sun</i>                                                                                                                               | 262 |
| $\beta$ -Thalassemic Mutations Recognized by DNA Mapping with <i>Hph</i> I and <i>Rsa</i> I in the Algerian Population<br><i>Gila Kohen, Nathalie Salome, Tawfiq Henni, and Jacqueline Godet</i>                                                                                        | 269 |
| Ligand-Induced Variations in Subunit Associations in Bovine Heart F <sub>1</sub> -ATPase<br><i>Christopher D. Goldsmith and Robert A. Reid</i>                                                                                                                                          | 273 |

|                                                                                                                                                                                                   |     |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Obligatory Role of a Tris/Choline Allosteric Site in Guanine Nucleotide Regulation of L-[ <sup>3</sup> H]QNB Binding to Muscarinic Acetylcholine Receptors                                        |     |
| <i>Kenneth M. M. Murphy and Antonio Sastre</i>                                                                                                                                                    | 280 |
| Isolation of Fatty Acids Covalently Bound to the Gastric Mucus Glycoprotein of Normal and Cystic Fibrosis Patients                                                                                |     |

| Human ProapoA-I <sub>Tangier</sub> : Isolation of ProapoA-I <sub>Tangier</sub> and Amino Acid Sequence of the Propeptide                                                                    | <i>H. B. Brewer, Jr., T. Fairwell, M. Meng, L. Kay, and R. Ronan</i>                                                                                     | 934  |
| Affinity Labeling of Peptidyl Transferase Center Using the 3' Terminal Pentanucleotide from Amino Acyl-tRNA                                                                                 | <i>M. Pérez Gosalbez, G. Leon Rivera, and J. P. G. Ballesta</i>                                                                                          | 941  |
| Androgenic Alteration in Pathways of C <sub>19</sub> -Steroid Metabolism by Cultured Rat Granulosa Cells                                                                                    | <i>Young S. Moon, Antoni J. Duleba, and Peter C. K. Leung</i>                                                                                            | 948  |
| Tissue and Substrate Specificity of Inhibition by Alkoxy-aryl-lactams of Platelet and Arterial Smooth Muscle Cyclic Nucleotide Phosphodiesterases: Relationship to Pharmacological Activity | <i>Claire Lugnier, Anita Stierlé, Alain Beretz, Philippe Schoeffter, Alain Lebec, Camille-Georges Wermuth, Jean-Pierre Cazenave, Jean-Claude Stoclet</i> | 954  |
| Protein Kinase Activity of Purified Components of the Chicken Oviduct Progesterone Receptor                                                                                                 | <i>Teresa Garcia, Pentti Tuohimaa, Jan Mester, Thierry Buchou, Jack-Michel Renoir, and Etienne-Emile Baulieu</i>                                         | 960  |
| Application of Phase-Sensitive Two-Dimensional Correlated Spectroscopy (COSY) for Measurements of <sup>1</sup> H- <sup>1</sup> H Spin-Spin Coupling Constants in Proteins                   | <i>D. Marion and K. Wüthrich</i>                                                                                                                         | 967  |
| Nonmineralized and Mineralized Compartments of Bone: The Role of Pyridinoline in Nonmineralized Collagen                                                                                    | <i>Albert J. Banes, Mitsuo Yamauchi, and Gerald L. Mechanic</i>                                                                                          | 975  |
| Vitamin D <sub>3</sub> Metabolites in Rat Epididymis: High 24,25-Dihydroxy Vitamin D <sub>3</sub> Levels in the Cauda Region                                                                | <i>Gideon Kidroni, Ruth Har-Nir, Jacob Menczel, Irving W. Frutkoff, Zvi Palti, and Moshe Ron</i>                                                         | 982  |
| Rat Heart Mitochondria Release Adenosine                                                                                                                                                    | <i>Richard D. Bukoski, Harvey V. Sparks, and Leena M. Mela</i>                                                                                           | 990  |
| Protection from DNA Damage during an Ischemic Cell Injury                                                                                                                                   | <i>C. Terry Warnick and Harrison M. Lazarus</i>                                                                                                          | 996  |
| Post-translational Modification of Hemoglobin in Alcoholism                                                                                                                                 | <i>Henry D. Hoberman</i>                                                                                                                                 | 1004 |
| Purification and Partial Characterization of Two Cyclic AMP-Independent Protein Kinases from AH-66 Hepatoma Cells                                                                           | <i>Shigeo Nakajo, Takashi Shimizu, Katsumi Shinkawa, Kazuyasu Nakaya, and Yasuharu Nakamura</i>                                                          | 1010 |
| Translational Control of the Expression of the $\beta$ Subunit Gene of <i>E. coli</i> RNA Polymerase                                                                                        | <i>Susan Peacock, Nathan Brot, and Herbert Weissbach</i>                                                                                                 | 1018 |
| Estradiol-Induced Changes in Rabbit Luteal Cell Progesterin Production and Cholesterol and Cholesterol Ester Content                                                                        | <i>John A. Holt, James R. Schreiber, and Barry R. Zirkin</i>                                                                                             | 1026 |
| AUTHOR INDEX, Volume 113                                                                                                                                                                    |                                                                                                                                                          | 1034 |

The Subject Index for Volume 113 will appear as part  
of a cumulative subject index for the year 1983
